Outdoor dining can increase revenues by over 30%
(Simons Advisory Group research)

Cardinal Architectural's WeatherGuard Motorized Pergola lets you control your outdoor dining environment, instead of the outdoor environment controlling you!
"When people see guests dining outside, it gives an energy to the place and reminds people of the hospitality they too, can expect when they walk in our doors."

Consider the following:
✓ Patrons will linger longer to enjoy the environment and surroundings
✓ Draw positive attention to your restaurant
✓ Increase the number of people you can seat at any given time
✓ Clumsy umbrellas are a safety hazard and will not work in wind or rain
✓ Tents are a maintenance nightmare

- Perfect For Outdoor Bars
